

1928 – Atwater Kent - Model E3 The Loudspeaker

Categoria/category: Altifalante de Cone / Cone Loudspeaker

Construção / Construction: Aço e alumínio / *Steel and aluminum.*
Painel / Baffle: Circular / *Circular (with aluminum golden star).*
Motor: Eletroímã e lâmina de aço / *Electromagnet and steel reed.*
Tipo / Type: Modelo de mesa / *Table model.*
Cone: Papel rígido / *Rigid paper (single edge cone).*
Produzido / Produced: 1928.
Nº série / Serial number: 500988.
Impedância / Impedance: 2000 Ω.
Dimensões: 285 x 335 x 115 mm.
Peso / Weight: 3 kg.

Experiência: [Pode ouvir aqui uma demonstração deste altifalante](#)

Historia/History:

- In 1895, Arthur Atwater Kent founded the Kent Electric Manufacturing Co. in the back room of his father's machine shop. He designed, made, and sold small electric motors and fans.
- In 1902, the Atwater Kent Mfg. Works were founded in Philadelphia, which later, in 1919, became the Atwater Kent Manufacturing Company.
- In 1921, Kent started to engage in radio, producing Bakelite variocouplers, RF and audio transformers. In 1922, he offered the first breadboard radio series, the 39xx types. These radios, when one of their variocouplers was added, became a regenerative radio, but this idea, patented by Armstrong, was the responsibility of the user and without Kent's responsibility.
- Atwater Kent radios [are treasures for today's collectors.](#)
